Qualitative Inquiry in Evaluation: From Theory to Practice

In this presentation, Dr. Goodyear will review key elements of high quality qualitative evaluation. Through case illustrations drawn from evaluation experience, she will describe how these elements are put into practice. Awareness of these elements, and a focus on developing the skills to ensure that they are present, robust and well managed, are central to becoming a skilled qualitative evaluator. The workshop will be interactive. We encourage participants to share examples from their own evaluation efforts.

Thursday April 23. 3pm - 5 pm, in Mann 102
